

Digital Voice IQ

interactive telesis:

More than talk: Proven Success.
More than technology: Solid Solutions.

Never miss a critical message again

Digital Voice IQ allows you to receive time-critical messages, guaranteed. When its imperative your messages get through you need a reliable notification system. Digital Voice IQ manages the notification process and ensures delivery. With Digital Voice IQ you will never again miss a critical notification.

Digital Voice IQ delivers, acknowledges, and logs all notifications. Digital Voice IQ allows you to receive time-critical messages when you need them, NOW. Interactive Telesis' advanced call management guarantees message delivery.

More than simple notification - Two-way communication

Digital Voice IQ is much more than a simple static text message; it's an advanced notification system. Digital Voice IQ provides notification via intuitive voice prompts, and text-to-speech that's clear and understandable.

You set up the rules from simple to advanced. The rules are completely customizable to help you manage the notification process and guarantee delivery.

Simple to setup and easy to use

Digital Voice IQ integrates seamlessly with existing messaging systems via an SMTP interface. All administration, reporting, and configuration are available via a web interface for easy and remote access.

The product is contained in a single easy to maintain system. Plug in the power, plug in the phone line, setup your notification rules and never miss a critical message again. It's that simple.
